We've orchestrated a revolution.

MelodyWave™ Instruments Unleash MIDI Technology.

Take MIDI 2, and multiply it by forty-nine. That's the idea behind our incredible new patented* MelodyWave™ Instruments, the latest in music technology from Schulmerich.

They free MIDI from a single player and a single instrument – a keyboard, a guitar, a PC – and turn it loose to play with a band, choir, or orchestra. Even with an entire classroom.

For performers and educators, it's a dream come true. And it's available now, exclusively from Schulmerich.

Presenting... The Wireless Orchestra.

With 13, 25, 37 or 49 wireless batons, your MelodyWave™ Instruments have enough range to cover from one to four octaves.

But that's only when you set them up sequentially as a single voice.

And you can think bigger than that.

How about making a dozen of them into a drum kit, while the rest are busy being pianos? Or violins? Or steel drums?

It's possible, and it's easy.

Your musical world will never be the same.

Get used to it.

The Brand New Legendary Sound Of Schulmerich.

We've been innovators since 1935, and our instruments have brought the sound of bell music to more people and places than anyone else in the world.

With MelodyWave™ Instruments, we've brought innovation to a whole new level. Touch-sensitive batons for full dynamic expression. A simple interface that makes setup fast and flexible. A wireless base station that works with your MIDI tone generator. A rock-solid carrying case that actually *plugs in* to charge the MelodyWave™ batons.

What will we think of next?

We'll Help You Put The "Play" Back In Music.

MelodyWave™ Instruments really shine in a general music program. After all, why just teach your kids about the orchestra when you can make them into one?

Imagine turning a classroom into one great big cooperative piano. Adding a horn section. And maybe tossing in a little percussion just to keep things interesting.

What fun.

What a learning experience.

What an instrument.

Nothing's More Flexible Than A Wave.

We think MelodyWave™ Instruments should fit you, not the other way around.

So your set will include 13, 25, 37, or 49 batons, a charger/carrying case, and a rack-mountable wireless base station. Plug the base station into your own MIDI 2 tone generator, hook up your amplifier and speakers, and you're ready to rock and roll. Or strike up the band. Or fiddle around. Or tickle the ivories. Or, well, whatever. After all, you've got up to 256 voices to play with.

Catch it.

Our custom tables enhance performance while they make playing MelodyWave™ instruments more comfortable. They're 36" long, 30" wide, and height adjustable from 29" to 42". Foam pads and pinwale corduroy table covers — in Midnight Black, Dark Green, Navy Blue, and other colors — are available too.

Electronic Carillons

Our Generation 4™ Electronic Carillons put extraordinary bell sounds at your command for automatic play or keyboard performance. They're the voice of churches, memorial parks, public buildings, and commercial institutions worldwide.

ShineOn™ Anti-Tarnish Finish

Only Schulmerich handbells are available with the molecularly bonded ShineOn Anti-Tarnish Finish. Routine care is simple, and major polishing is a thing of the past.

Handbells and MelodyChime® Instruments

Schulmerich handbells are rung by more choirs, schools, churches, and institutions than any other – and our MelodyChime® Instruments lead the industry in sound and playability.

The Schulmerich Story

Founded in 1935, Schulmerich sets world standards for excellence in bell instruments. We pioneered the world's first electronic carillon in the late 1930's and early 1940's, and in 1962 we became the premiere North American maker of handbells. Our MelodyChime Instruments broke additional ground in 1998.

Call or visit us on the web soon. We'll help turn your musical dreams into reality.

Bell Towers and Cast Bell Instruments

Our bell towers and cast bell instruments continue mankind's long relationship with the power of bell music. We're proud to be part of that enduring tradition.
